

Removable black plastic base, especially designed for our **A-Flex** bollard with folding top cover. By simply inserting a flexible bollard into the base. The bollard can be locked with a standard triangular key located on the side of the base, in order to lock the cover it is closed or to lock the bollard once it is placed in the hole.

A-ECO MODELS:

- Black..... Ref. PECHN
- Green Ref. PECHV
- Red Ref. PECHR
- Yellow..... Ref. PECHA

+

REMOVABLE BASE:

- Black..... BEXTRAP01

Limited flexibility: in the event of a collision, if its maximum flexibility point is not exceeded, the bollard will go back to its original position, without losing its shape or form. If the point of maximum flexibility is exceeded, this bollard won't break as if it was made from conventional plastic, iron or cast iron. This peculiar quality makes it an economic and durable option.

Its low cost makes it ideal for new installations and for the replacement of existing broken iron bollards.

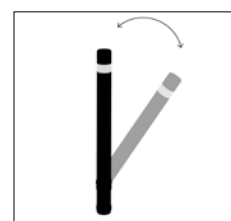

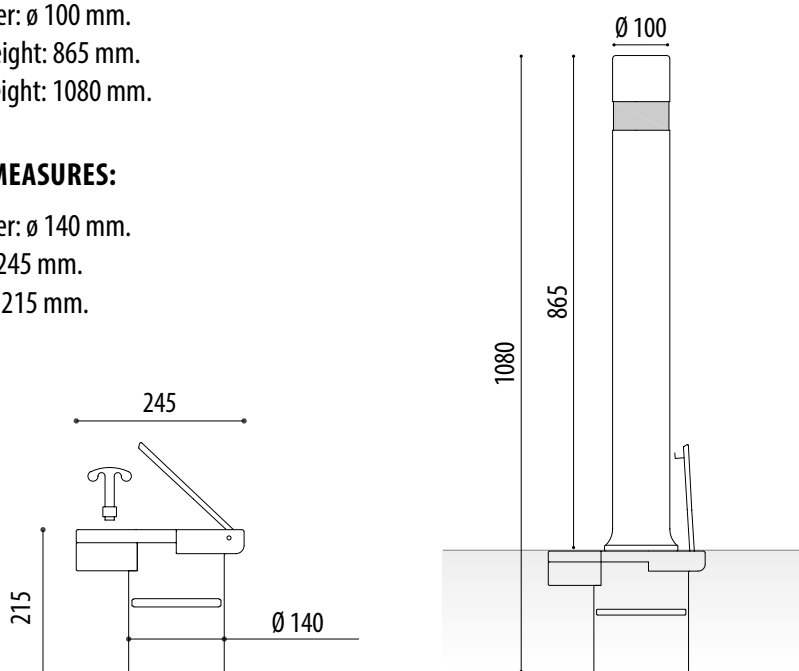

As they have the same appearance of the A-Flex bollards, in the application they can be combined with each other, thus reducing the cost of installation.

● BOLLARD MEASURES:

Diameter: Ø 100 mm.
View height: 865 mm.
Total height: 1080 mm.

BASE MEASURES:

Diameter: Ø 140 mm.
Width: 245 mm.
Height: 215 mm.

Limited flexibility.

ADVANTAGES COMPARING TO OTHER BOLLARDS:

Vs bollards made of metal:

- Not rust.
- Less weight.
- Doesn't break on impact, it can't harm people.

Vs bollards made of plastic:

- Doesn't break on impact, it can't harm people.

A-ECO BOLLARDS ADVANTAGES:

-  100 % recyclable.
-  Not painted. No rust. Maintenance-free.
