

The **A-Blen ECO semi-flexible bollards** are made out of a plastic material that provides them with **limited flexibility**: in case of an impact, if it does not overcome their flexibility, they recover their original position without any permanent damage.

**Screwable A-Blen ECO** semi-flexible bollard with a central lower bolt for ground anchoring. Easy installation by means of its screwable system based on a single bolt to screw to the ground, resulting in no alteration of the bollard's features.

### SCREWABLE A-BLEN ECO 100 MODELS:

Black .....	Ref. PBLENECON
Green .....	Ref. PBLENECOV
Red .....	Ref. PBLENECOR

Hook spanner for screwing  $\varnothing$  100 A-Blen  
Ref. LLBLENT

### EASY INSTALLATION:

1- Make a hole on the ground to fix the anchor.

2- Clean up and fill the hole with epoxy resin.

3- Insert the anchor and wait as it gets dry.

4- Screw the bollard manually.

5- Help yourself with the optional hook spanner during the last stage.

### A-BLEN ECO BOLLARDS FEATURES:

-  100% recyclable.
-  Not painted. They do not rust. No need of maintenance.
-  Limited flexibility.
-  High resistance to oils, greases and several solvents.
-  High abrasion resistance.
-  Aesthetically identical to metal bollards.
-  Pleasant touch.
