

**Energy electric bicycle parking set** in zinc-plated steel + grey oxiron that allows electric bicycles to be charged while they are parked by means of an external power socket IP55 at 230V.

Set of bicycle racks with energy socket ideal for places where you need to park sets of 4,5,6 electric bicycles.

The sockets are watertight once closed, but if the lid is left up when charging the bike, in case of rain it would be unprotected, it is recommended to install the racks in a covered area.
