

Planters in closed position avoiding the vehicle passage.

Detail of the opening of the blocking of the planter.

Start of the planter turning system.

The planter rotates 360°, being able to choose the travel at the time of installation.

Detail of the blocking of the planter in the final point.

Planters in open position to allow the passage of vehicles.

Anti-moon security planter specially built to resist the vandalism of vehicles landing on the moon.

Ideal for all those places where there is a risk of landing on the moon.

Manufacture of the planter model required by the client, adapting it to the necessary security systems.

OPTIONAL:

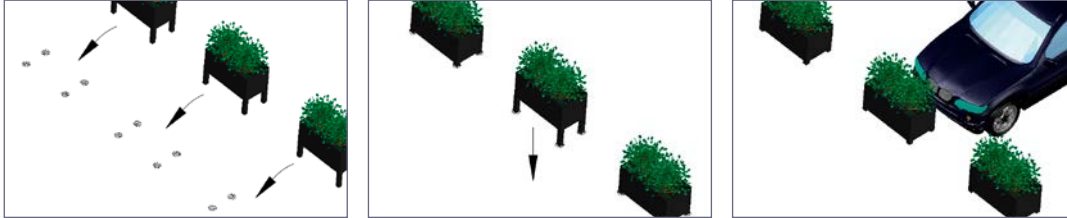

- Lacquered in other colors, laminated finish or stainless steel.
- Bricat corten steel finish (catalyzed varnish).
- Personalization with logo engraving.
- Other measures to consult.

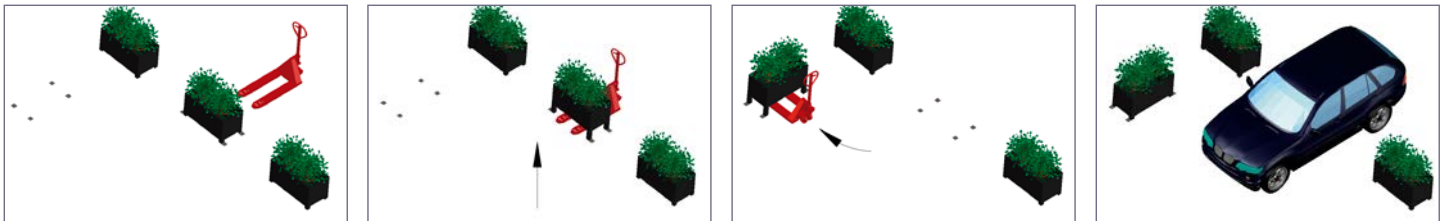

Possibility to adapt our planters to hydroplanters.

TYPES OF ANTI-MOON PLANTERS:

Fixed: Fixing system anchored directly to the ground, thus preventing the planter from moving in the event of an impact.

Removable: Removable system, planter fixed to the ground allowing it to be removed in exceptional cases, placing it in another provisional place intended for the location of the planter, (fixed or removable fixing system according to customer needs).

Rotating: Concealed swivel system and fastening lock to resist the impact of vehicles, ideal for all those places that need the passage of vehicles (cleaning, ambulances, police, firefighters,...).
