

Lockers to store bicycles.

Modular lockers that can be screwed together or fixed to the wall.

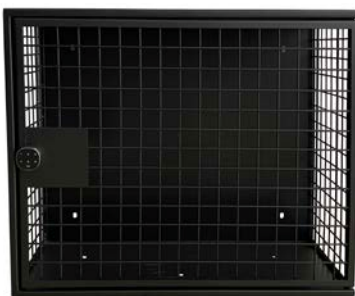

Standardized locker measurements for most 16 or 20-inch wheel folding bikes (Bronton, Decathlon, Dahon, ...).

The locker has in the central part a digital electronic coded lock with a touch screen opening-closing technology by means of a numerical combination to avoid having to carry a key and padlock.

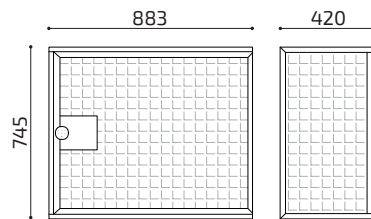

STANDARD FINISHES:

Black.

Write.

TAQBICI

The user selects the desired coding for a single use (from 4 to 16 digits), allowing the bicycle or scooter to be parked without the use of chains or padlocks; and once the parking time has ended, the user enters their code to collect the bicycle or scooter.

Ideal locker for offices, hotels, shopping centres, shops, town halls, gyms, private venues, ...
